Dear Sirs and Mesdames

Re: BrokerCENTRAL Software Review

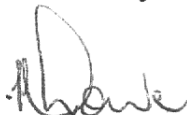

Further to your request, we have reviewed the BrokerCENTRAL software from an audit perspective and report as follows:

BrokerCENTRAL incorporates the required controls to allow reliance to be placed on the information extracted from the system. It enables audit trails to be performed, including extraction of various predefined and ad hoc reports to allow audit verification. In addition, the system is capable of assisting insurance brokers to comply with the requirements of the Corporations Act 2001 and the insurance brokers' license conditions.

Overall, the system satisfies all audit requirements.

Please do not hesitate to contact us should you require any further information or clarification.

Yours faithfully

VIN CROWE & ASSOCIATES
